Profile

Motivated and detail-oriented Computer Science graduate with hands-on experience in **full-stack development using Python (Flask) and React.js**, along with a strong foundation in **data analytics**. Skilled in building RESTful APIs, developing responsive web applications, managing databases, and creating data-driven dashboards. Proficient in **Python, SQL, Power BI, and modern web technologies**, with a passion for problem-solving and continuous learning.

Education

Dr. Babasaheb Ambedkar Marathwada University. <i>Bachelor of Engineering in Computer Science and Engineering.</i> CGPA: 6.38	2025 Chh. Sambhaji Nagar, India
Government Polytechnic,Yavatmal <i>Diploma In Computer Engineering</i> Percentage: 83.29%	2021 Yavatmal, India

Experience

Full Stack Python developer Intern

Zerlak Technology

Pune, India | Nov-2025-Present

- Developed and maintained RESTful APIs using **Python (Flask)** for backend services
- Built responsive and interactive user interfaces using **React.js**, HTML, and CSS
- Designed reusable frontend components to improve scalability and maintainability
- Integrated frontend with backend APIs and handled end-to-end data flow
- Managed database operations and ensured efficient data handling
- Enhanced user experience through responsive design and performance optimization

Projects

Student Management System For Library

- Developed a full-stack **Library Management System** using **React.js** and **Python (Flask)**
- Designed dynamic and responsive UI with reusable components for better scalability
- Built RESTful APIs to handle book records, student data, and transaction management
- Managed database operations for efficient storage and retrieval of library data
- Streamlined library processes by automating record management and reducing manual effort
- Integrated frontend with backend to enable seamless data flow and system functionality
- Improved record management by digitizing library operations

Angular Engineering Website

- Developed a responsive web application using **React.js** for the frontend
- Designed and implemented reusable UI components for better scalability
- Ensured cross-browser compatibility and mobile responsiveness
- Optimized performance and user experience through efficient state management
- Deployed the application and managed live production environment

PPCONS Automation LLP

- Developed and deployed a corporate website for a fire protection solutions company
- Designed responsive UI using **React.js**, ensuring seamless experience across devices
- Showcased services including fire safety system design, installation, and maintenance
- Structured website for better user navigation and service visibility
- Improved online presence for an industrial fire safety business through modern web design
- Collaborated on content structure to align with business offerings and industry standards

Cylinder Tracking Web Application

- Developed a web-based cylinder tracking system to monitor and manage industrial gas cylinders
- Built responsive and user-friendly interfaces using **React.js** for real-time data visibility
- Designed and integrated RESTful APIs using **Python (Flask)** for seamless frontend-backend communication
- Implemented features for tracking cylinder movement, inventory status, and transaction history
- Enabled efficient asset management, reducing manual tracking errors and improving operational efficiency
- Managed database operations to store and retrieve cylinder lifecycle and user data

Certificates

- **Office Master**-PowerBi Workshop By Office Master
- **Advanto Software**- Data Analyst with Python
- **Advanto Software**- Full Stack Python

Skills

- **Programming Languages:** Python, C, C++
- **Frontend Technologies:** React.js, JavaScript, HTML5, CSS3
- **Backend Technologies:** Python, Flask, REST APIs
- **Databases:** MySQL, Microsoft SQL Server
- **Data Analytics:** Power BI, Excel, NumPy, Pandas
- **Tools & Platforms:** Git, GitHub, Linux, VS Code
- **Concepts:** OOP, Database Management, API Integration, Debugging
